

Green Lake County Birth to 3

Kristen Mertens

I have been working as a Speech-Language Pathologist since 2000 currently working for Thedacare Medical Center Berlin. I completed my studies at the University of Wisconsin-Madison returning to my hometown of Berlin after graduation. My husband and I enjoy raising our children in the community in which both of us were also raised. I enjoy seeing patients of all ages in a variety of settings, including patient's homes, hospitals, clinics, and nursing homes. I have a special interest in feeding and swallowing difficulties across the lifespan. I also work with patients with a variety of communication and cognitive deficits.

Jody Streeter

I have been a physical therapist since 2001. I received my undergraduate degree at Marian College of Fond du Lac and my Master's of Physical Therapy degree from Concordia University in Mequon, WI. I currently work with patients in all age groups and really enjoy the diversity of my job. Working with pediatrics is such a rewarding part of my career, as I am able to help children grow and develop to their fullest potential.

Tara McPeak

I have been working in Occupational Therapy for over 10 years. I started my journey in Occupational Therapy at the assistant level completing my Masters in 2015. In addition to being a member of the Birth to 3 team, I work with children in the school setting and with patients of all ages in an in-patient hospital setting. I have always had a passion for working with children and love helping them develop the skills they need as they grow. I love a challenge and using creative methods to motivate my patients.

Renee Peters

I have been the Program/Service Coordinator and Educator with the Green Lake County Birth to 3 Program since 2000. In addition to the Birth to 3 Program, I coordinate the Children's Community Options Program which provides funding for materials/services for families with children from birth to age 22 who have a severe physical, developmental or emotional impairment which limits their functioning. I received my degree in Special Education from the University of Wisconsin Oshkosh. It is truly a privilege to work with the families, physicians, school personnel and the many other members of our community for the purpose of promoting each child's learning and development.
