

Green Lake County Birth to 3 Staff

I have been working as a Speech-Language Pathologist since 2000 and have been with Community Health Network for over six years. I completed both my studies at the University of Wisconsin-Madison returning to my hometown of Berlin after graduation. My husband and I enjoy raising our children in the community in which both of us were also raised. I enjoy seeing patients of all ages in a variety of settings, including patient's homes, hospitals, clinics, and nursing homes. I have a special interest in feeding and swallowing difficulties across the lifespan. I also work with patients with a variety of communication and cognitive deficits.

Jenny Hoffman

I am a graduate of the UW-Madison, Occupational Therapy Program. I have training in Neuro-Developmental Treatment and I have completed additional coursework related to the treatment of Sensory Processing Disorders. My main focus for intervention is on engaging children in dynamic and motivating activities that will enhance their functional abilities and independence. I am dedicated to working with families by providing information and strategies that will help promote their child's development.

Jody Streeter

I have been a physical therapist for 7 ½ years, and worked with pediatrics for 4 ½ years. I received my undergraduate degree at Marian College of Fond du Lac. I received my Master's of Physical Therapy degree from Concordia University in Mequon, WI. I currently work with patients in all age groups and really enjoy the diversity of my job. Working with pediatrics is such a rewarding part of my career, as I am able to help children grow and develop to their fullest potential.

Renee Peters

I have been the Coordinator and educator with the Green Lake County Birth to 3 Program since 2000. Prior to making our home in Green Lake County, I was a service coordinator and teacher for Fond du Lac County's Birth to 3 Program. I received my degree in Special Education from the University of Wisconsin Oshkosh. It is truly a privilege to work with the families, physicians, school personnel and the many other members of our community for the purpose of promoting each child's optimal development.
